

NIKHIL KUMAR

☎ +91 9560582209 ✉ nikmishr19@gmail.com 📍 New Ashok Nagar, Delhi

Objective

Analytical B.Tech CSE (Machine Learning) student with hands-on experience in AI-generated content review, data validation, prompt testing, and documentation. Proficient in Python, SQL, and research workflows. Seeking AI Evaluation & Annotation roles where I can contribute to agent behavior analysis, quality assurance, and data-driven process improvement.

Skills

AI & Evaluation: Google Gemini, ChatGPT, Prompt Engineering, AI Content Review & Annotation, Agent Behavior Analysis, Output Quality Assessment
Programming Languages: Python, JavaScript, SQL
Data Analytics: Microsoft Excel, Power BI, Data Validation, Operational Metrics, Reporting & Dashboard Development, Data Visualization, Statistics Fundamentals, Pandas, NumPy
Web Development: HTML, CSS, Tailwind CSS, React, Node.js, Express.js, MongoDB
Tools & Technologies: Git, GitHub, PostgreSQL, WebSockets (Basic)
Soft Skills: Analytical Thinking, Problem Solving, Communication, Documentation, Team Collaboration, Attention to Detail, Time Management

AI Evaluation Experience

Hands-on AI Tools Testing & Analysis

Self-initiated

- Regularly tested and evaluated AI model outputs (ChatGPT, Google Gemini) for accuracy, logical consistency, tone, and task completion quality across varied prompt types.
- Analyzed prompt behavior and documented edge cases where AI responses deviated from expected outcomes, developing structured notes on failure modes and improvement areas.
- Reviewed AI-generated content for quality and coherence as part of building the AI Resume Generator project, applying annotation-style feedback loops to refine output.
- Familiar with web-based AI tools and agent workflows; able to assess real-world user journey effectiveness against intended task goals.

Projects

AI Resume Generator | *Automated Document Pipeline & AI Output Evaluation*

- Evaluated and annotated AI-generated resume outputs across 100% of test cases, identifying inconsistencies in tone, structure, and content accuracy — reducing generation errors to near-zero.
- Designed and tested prompts systematically, analyzing AI performance across different input formats and refining prompt logic to improve output quality and consistency.
- Reduced resume generation time from ~45 minutes to under 2 minutes by automating content structuring and template population using a generative AI pipeline.
- Applied procedural controls on input processing — validating, cleaning, and standardizing user data before passing it to the model — ensuring consistent, high-quality outputs.

Live Sports Dashboard | *Real-Time Operational Reporting*

- Improved operational reporting accuracy by 100% by building a real-time data validation pipeline in Node.js and PostgreSQL that cross-checked live match statistics against source feeds.
- Reduced manual reporting effort by ~3 hours per match cycle by automating structured dataset ingestion and dashboard refresh workflows, enabling instant access to operational metrics.
- Strengthened procedural controls over data publishing by implementing schema-level validation checks, ensuring no erroneous records reached the reporting layer.

LMS Website | *Full Stack Data Management Platform*

- Improved data management efficiency by 40% (query response time) by designing a normalized database schema and structured reporting workflows across 10+ REST APIs.
- Reduced reporting inconsistencies to near-zero by enforcing role-based data access controls and input validation rules, maintaining high data integrity standards.
- Built dynamic dashboards surfacing key operational metrics — enrollment rates, completion status, and activity logs — enabling faster decision-making for educators.

Bank Transaction System | *Financial Data Integrity (In Progress)*

- Building a financial transaction management system targeting zero revenue leakage by implementing double-entry validation logic and audit trail logging using Node.js, Express.js, and MongoDB.
- Designing procedural controls for data integrity — including schema enforcement and error-state handling — mirroring the discipline required in operational financial reporting environments.

Courses & Certifications

Data Analytics with AI Certification (Ongoing) *Physics Wallah (PW)*

Excel, Power BI, SQL, Dashboard Development, Reporting, Data Visualization, Statistics

Python Programming Course *Hitesh Choudhary*

Education

B.Tech — Computer Science & Engineering (Machine Learning) *2023 – 2027*
Gautam Buddha University **CGPA: 8.56**

Class XII *2023*
Vidya Bal Bhawan Sr. Sec. School, Mayur Vihar Phase-3

Class X — 89.28% *2021*
Vidya Bal Bhawan Sr. Sec. School, Mayur Vihar Phase-3

Extra-Curricular Activities

- Active member of Literary and Debate Societies — strengthened written and oral communication skills.
- Participated in Cultural Events and Theatre Activities, demonstrating teamwork and leadership.
- Passionate about Football and Cricket; developed strong collaboration and performance-under-pressure mindset.
